

quick reference guide

how to configure Chrome to accept cookies

changing your cookie settings

To maintain your Umpqua online banking device registration (and not have to obtain and enter a Secure Access Code every time you log in), your browser must be configured to accept and retain cookies from Umpqua Bank.

You can do this two different ways:

- [Accept cookies only from Umpqua only](#), or
- [Accept cookies from any website](#)

If you want only Umpqua's website to remember you, follow the steps to accept cookies only from Umpqua. (This option will not automatically log you into your Umpqua online banking account; instead, the cookies will help our website remember your device and browser combination, so you're not asked to obtain and provide a Secure Access Code after your initial registration. For your security, Umpqua does not provide an automatic login feature.)

If other websites aren't remembering you even though you want them to, follow the steps to accept cookies from any website.

Reminder: If your device is set up to regularly delete cookies or has an automated program that deletes cookies, you will be prompted to register your device after that deletion occurs. You also may be prompted to register your device again if you upgrade your operating system or browser.

quick reference guide

how to configure Chrome to accept cookies

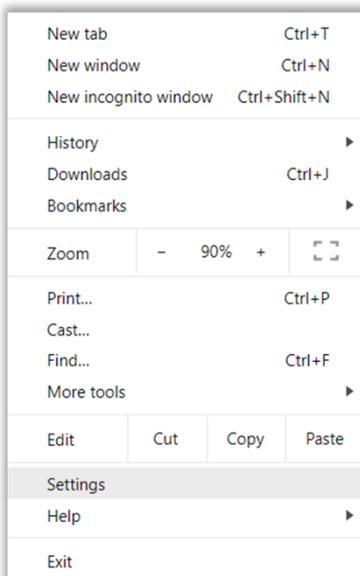

how to accept cookies only from Umpqua

1. Click the **Menu** (three dots or lines) icon at the top right corner of the browser on desktop.

2. Select **Settings** from the drop-down menu.

5. Select **Cookies**.

6. Under **Allow** section, select **Add**, enter **UmpquaBank.com**, then select **Add** again.

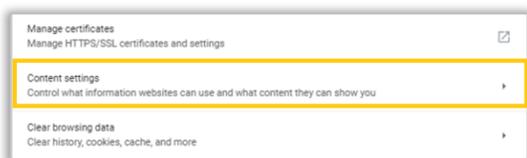

7. Close and reopen Google Chrome browser.

Congratulations! Chrome will now accept cookies from Umpqua Bank. You can register your device!

3. Scroll to the bottom of the page and click **Advanced**.

4. In the **Privacy and security** section, click **Site Settings**.
